

**Programme Name:** Orientation Programme

**Date and Time:** 16/09/2020 at 11am

**Number of Participants:** 30

An online orientation programme was held on 16<sup>th</sup> September, 2020 at 11am. Due to covid situation the programme has been conducted on online mode. Two new teachers and the 1st sem students have joined the department this time. To make a new coordination between all faculties and students in this department, this programme is arranged. Each faculty explains the utilities of the subject chemistry and how the CBCS syllabus of the semesters are distributed. The reason for development of CBCs system and the syllabus was also explained to them. So that, they can see the career goals and recognise the new arrears of chemistry. The difference and linkage between practical and theoretical classes at different semesters also explained to each semester students. Two of the faculties explained the google meet suite and google classroom usages. How to submit assignments and class works etc.

After all this serious and career-oriented discussion, the students are asked to introduce themselves and do anything cultural like singing, recitation or share their experience of life with everyone. The programme was arranged to make a connection between the students (senior junior) and teachers at the first time they entered the college. The 1st semester students came from school to college in this pandemic situation and were very confused with the system of online mode and also, they had less confidence about their career this time. The department has tried its best to make the day remembered as the first day of college and to make a friendly connection between faculty and students. On a serious note, the difference between semester system (now) and Annual examination system (upto class 12) also introduced to the students.
