## WHY ENLIGHTENMENT

- Since Plato and Aristotle, we have been searching our true self.
- **Epistemology** (concerned with **HOW** we can know about the world) and **Ontology** (concerned with **WHAT** we can know about the world) have been the areas of enquiry since time immemorial.
- But then why focussing on Enlightenment?
- True, Plato and Aristotle are still very relevant as far as our search for knowledge goes. But Enlightenment opened up a new vista of critical approach towards this search for knowledge. Knowledge about self and knowledge about the world.
- Enlightenment itself gave us the scope to launch a critical attack on itself and on our vision of thinking.

2

## WHY ENLIGHTENMENT

- Enlightenment meant liberation from prejudice and superstition and the growing ability to think for oneself.
- Enlightenment is man's emergence from his self incurred immaturity. Immaturity is the inability to use one's own understanding without the guidance of another.
